

BUSHNELL PRO X2 INSTRUCTIONS

We've placed one of our Quick Clip belt clip tab/3M adhesive disk assemblies (see picture below) on the laser lens end of the Pro X2 for the optimal center of gravity. This is the precise location where you need to carefully place the belt clip tab/3M adhesive disk assembly. With your Quick Clip, we include 3 (two spares) of these belt clip tab/3M adhesive disk assemblies, alcohol cleaning wipes and extra 3M adhesive disks.

Using one of the included alcohol cleaning wipes, clean that spot on your Pro X2 and allow to air dry. This removes any oils, sweat, grease and other yucky stuff so the adhesion is optimized. Peel the paper backing off of one of the belt clip tab/3M adhesive disk assemblies. Very carefully place the belt clip tab on the spot as shown in the Pro X2. **CAUTION**: The belt clip tab/3M adhesive will want to stick immediately to whatever it touches so use care when placing it on the spot and try not to touch the adhesive with your fingers. Apply some pressure on the belt clip tab for about 30 seconds. Allow it to "set" for 48 to 72 before using your Pro X2 in the Quick Clip keyhole slot. That will enhance the adhesive properties of the 3M adhesive disk. **VERY IMPORTANT**: **If you follow** the directions "to the letter", the belt clip tab/3M adhesive disk assembly will stick instantly and you won't be able to remove it using your fingers/hands (you may draw blood). It certainly cannot come off during your everyday use on the golf cart. If you ever need to remove the belt clip tab, simply warm the adhesive with a hair dryer. The adhesive will soften and you can peel off the belt clip tab, though it still won't be easy. Don't try to re-use that 3M adhesive that you peeled off as it loses some of its adhesive properties. Remove it and use a fresh 3M adhesive disk (also in the package). You can reuse the black belt clip tab. Remove any remaining adhesive and clean it thoroughly with an alcohol wipe or a clean cloth with a dab of isopropyl (rubbing) alcohol. Carefully (see **CAUTION** above) place the fresh 3M adhesive disk on the belt clip tab.

Please don't hesitate to contact us if you have any questions or concerns. **We can't stress it enough – follow the directions to the letter!!**
