

BUSHNELL SPORT 850 AND BONE COLLECTOR INSTRUCTIONS

As you know Bushnell Sport 850 or Bushnell Bone Collector rangefinders do not have a tripod socket as do many laser rangefinders brands and most of the Bushnell laser rangefinders. These are very similar and require the Double Magnet Quick Clip due to their weight. The Quick Clip package for your Bushnell Sport 850 or Bone Collector rangefinder includes alcohol pads for cleaning the surface of your rangefinder of any dirt oils, etc. (**it's very important to use the cleaning pad as this enhances the adhesive properties**), three (two for spares) belt clip hooks both with an attached 3M VHB (Very High Bond) adhesive disk. When you attach the belt clip tab to your Bushnell rangefinder using the 3M adhesive disk, it adheres very strongly, very quickly and is semi-permanent so be careful when attaching it. **IMPORTANT NOTE:** **If you follow these instructions "to the letter" it is essentially impossible to remove the belt clip tab/3M adhesive disk assembly with your hands. It certainly cannot loosen up when in routine everyday use on the golf cart with your Quick Clip.**

INSTRUCTIONS: First, clean the location where you should carefully place one of the enclosed belt clip tab/3M adhesive disks. See picture of your Bushnell rangefinder below on which we have drawn a white circle centered at the optimum center of gravity below the laser lenses. Allow to air dry. Peel the paper backing off of one of the 3M adhesive and very carefully place it on the location where we have drawn the white circle. Apply pressure on the belt clip tab with your fingers for about 30 seconds. Before using your Bushnell rangefinder on the Quick Clip, **be sure** allow the adhesive to set ("cure") for a minimum of 48 hours. That also enhances the adhesion.

If you ever want to remove the belt clip tab, use a hair dryer to warm the adhesive for 30 seconds or so and it will peel off with no residue. Once removed though, the 3M adhesive disk can't be used again. You can of course re-use the belt clip hook (the black plastic piece), if it's not damaged. But always use a "fresh" 3M adhesive disk. If you need more of the 3M adhesive disks, belt clip tabs and alcohol cleaning pads, simply send us an e-mail and your address. We'll ship more to you at no charge.

Please don't hesitate to email or call us if you need help, have any questions and/or concerns.
