

GOLF BUDDY LR5 INSTRUCTIONS

As you know your Golf Buddy LR5 does not have a tripod socket as do many laser rangefinders brands such as all of the Bushnell laser rangefinders. The Quick Clip package for your LR5 includes a alcohol pad for cleaning the surface of your LR5 of any dirt oils, etc. (**it's very important to use the cleaning pad as this enhances the adhesive properties**), two (one for a spare) belt clip hooks both with an attached 3M VHB (Very High Bond) adhesive disk. When you attach the belt clip tab to your LR5 using the 3M adhesive disk, it adheres very strongly, very quickly and is semi-permanent so be careful when attaching it. **IMPORTANT: If you follow the instructions below "to the letter" it is essentially impossible to remove with your hands and it certainly cannot loosen up when in routine everyday use on the golf cart with the Quick Clip.**

INSTRUCTIONS:

First, clean the location (see picture of your LR5 below on which we have drawn a black circle on the laser lens end) where you should carefully place one of the enclosed belt clip tab/3M adhesive disks for the optimum center of gravity. Allow to air dry. Peel the paper backing off of one of the 3M adhesive and very carefully place it on the location where we have drawn the black circle. Apply pressure on the belt clip tab with your fingers for about 30 seconds. Before using your LR5 on the Quick Clip, allow the adhesive to set ("cure") for 48 to 72 hours. That also enhances the adhesion.

if you ever want to remove the belt clip tab, use a hair dryer or a heat gun (low setting) to warm the adhesive for 30 seconds or so and it will peel off with no residue. Once removed though, it can't be used again. You can re-use the belt clip hook (the black piece, if it's not damaged) but use a "fresh" 3M adhesive disk. If you need more of the 3M adhesive disks, belt clip tabs and alcohol cleaning pads, simply send us an e-mail and your address. We'll ship more to you at no charge.

Please don't hesitate to email or call us if you need help, have any questions and/or concerns.
