

SKYCADDIE AIRE INSTRUCTIONS

The Aire is so light that our single magnet Quick Clip (at 85 pounds of magnetic attraction) is more than adequate to very securely hold the Aire on the steel windshield/roof support frame of any golf cart. (In fact it's a bit of overkill). I've been using my Aire (see attached picture) for well over a year now with never a hint of it coming close to bouncing out of the Quick Clip Keyhole slot. The best thing about it is when you place the Quick Clip on the frame of the golf cart at your optimal eye level, then slide the Aire in the keyhole slot, you can easily view your yardages without removing the Aire from the Quick Clip. But if you need to take the Aire to a par three tee (or if you're playing on a "cart path only" day), you simply slip the Aire out of the keyhole slot and take it with you.

Each Quick Clip comes with three of our belt clip tab/3M adhesive disk assemblies (two for spares) to place on the back of your Aire as you can see in the picture. We also include extra 3M adhesive disks and alcohol cleaning pads (they are just simple rubbing alcohol that you can buy at drug stores). It's important to clean the back of your Aire with the alcohol pad as this removes any oils, dust dirt, fingerprints etc and thus enhances the adhesion. Once you place one of the belt clip tab/3M adhesive disk assemblies on the back of you Aire (place in the same spot as the picture shows), you won't be able to get it off with your fingers. **VERY IMPORTANT: If you follow the directions "to the letter", it will stick instantly and you won't be able to remove it using your fingers/hands (you may draw blood). It certainly cannot come off during your everyday use on the golf cart..** But if you ever need to remove it, simply use a hair dryer on high for several seconds. This softens the 3M adhesive and you can peel it off though it takes some effort. The black belt clip tab can be re-used but we recommend not trying to re-use the old 3M adhesive disks. They lose some of the adhesive qualities after they've been used and then removed. Always use a fresh 3M adhesive disk.

If you ever need more of the belt clip tab/3M adhesive disk assemblies and/or 3M adhesive disks, just send us an email with your name and shipping address and we'll ship some to you at no cost.

Remember...we are so confident that the Quick Clip is virtually indestructible and so easy and simple to use, it's the only rangefinder cart mount you'll ever need to buy. We guarantee that if you ever manage to break your Quick Clip (no one has in the 5 years we've been in business), just return the broken pieces to us and we'll replace it free, shipping included.

Also if for any reason you don't love the way the Quick Clip works with your rangefinder, just return it to us and we'll refund your \$\$ in full.
